

Overview

We are pleased to announce that the 17th Annual Royal Marsden Breast Cancer Meeting will take place on Friday 4th October 2024.

As always, we aim to cover a variety of hot topics in the management of breast cancer, and this year we will have a special focus on the diagnosis and management of lobular breast cancer, in addition to lifestyle issues associated with risk of breast cancer from the Million Women Study, and the impact of exercise on breast cancer outcomes and tolerability of therapy. In addition to our regular updates on what is new from recent conferences, we will discuss the surgical management of the axilla in elderly patients.

We are delighted to host Dr Icro Meattini from Florence, Italy, as our Cridlan speaker who will discuss the interaction of radiation therapy and systemic drugs. The meeting will conclude with the popular session of selected cases for our MDT to discuss.

The meeting is open to all professionals who are involved in looking after women with breast cancer, including clinicians and senior nurses.

We look forward to you all joining us again in October.

Professor Stephen Johnston

Professor of Breast Cancer Medicine & Head of The Breast Unit
The Royal Marsden NHS Foundation Trust
